HOW TO USE IT

Dilution: according to use

For cleaning and degreasing all surfaces:

dilute in water (1:10-1:20) and apply on the surface. Leave to act for 4-5 minutes before brushing with a single-disc floor scrubber or scrubbing brush. Use a cloth or liquid vacuum cleaner to clean any residues and then rinse thoroughly.

For a more vigorous cleaning, dilute 1:5.

To remove stains from porcelain tiles:

pour undiluted onto the stain and the entire tile. Leave to act until fully dry, then wash and rinse the surface.

To remove wax:

dilute 1:5, apply on the surface and leave to act for 10 minutes. Clean using a scrubbing brush or single-disc floor scrubber. Use a cloth or liquid vacuum cleaner to clean any residues and then rinse thoroughly.

Caution:

Do not use on new marble or polished stone.

Do not use on wood.

Do not use on methacrylate tubs.

Linoleum: carry out a spot test beforehand to check colour fastness.
